Introduction

The Intermarché Wine & Cheese App helps users quickly find the best wine and cheese pairings based on dishes or scanned products. Designed for tourists and locals.

Our main goal is to boost in-store purchases through smart, instant recommendations offline.

How to launch it

This project will be available both on our GitHub repository for public access and directly in Intermarché stores through QR codes, allowing users to experience it in real shopping conditions.

From Github

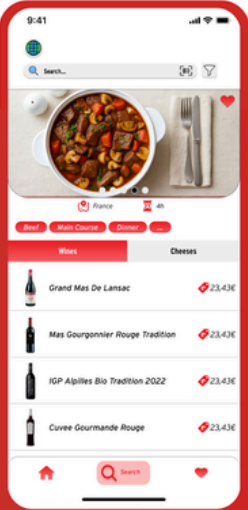

Simply visit this flyer:
<https://shorturl.at/epbnY>
and scan the QR code
to get started.

Intermarché

**MEALS, WINES, CHEESES
PAIRING APP**

Find the perfect pairings for any meal

- 1 Select a meal
- 2 View the wine and cheese recommendations

Scan to get the app

From Intermarché

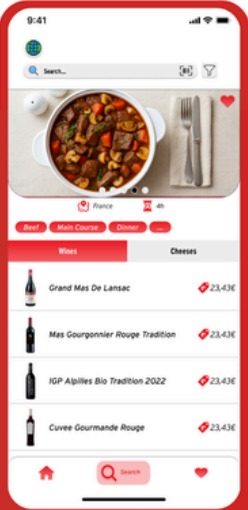

You'll find this flyer in the cheese or wine aisle—just scan the QR code to access the app.

Intermarché

How to use it

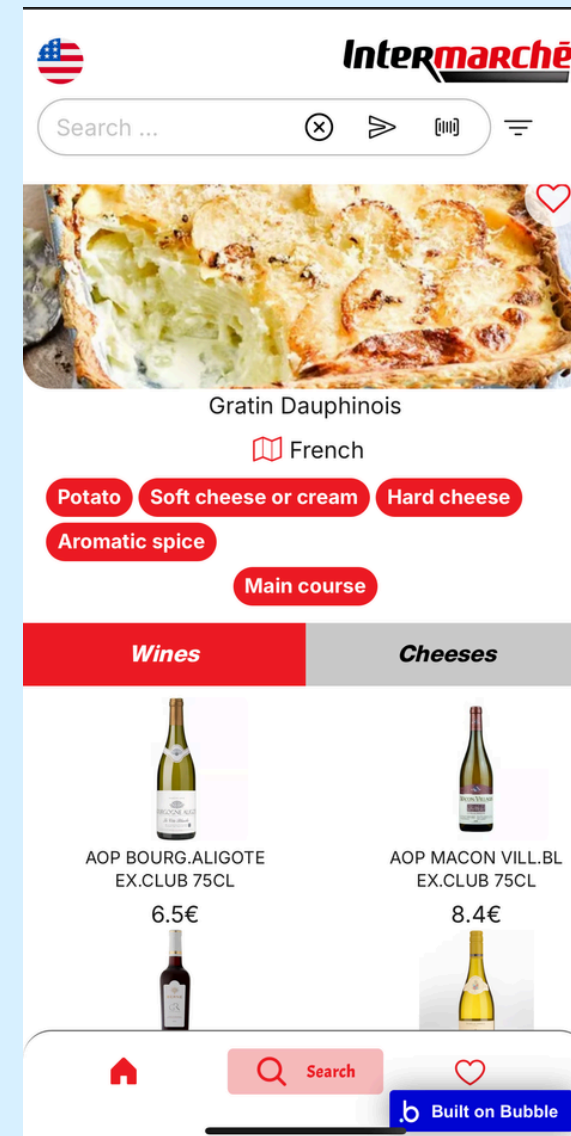

Once you scan the QR code, you'll be directed to this page.

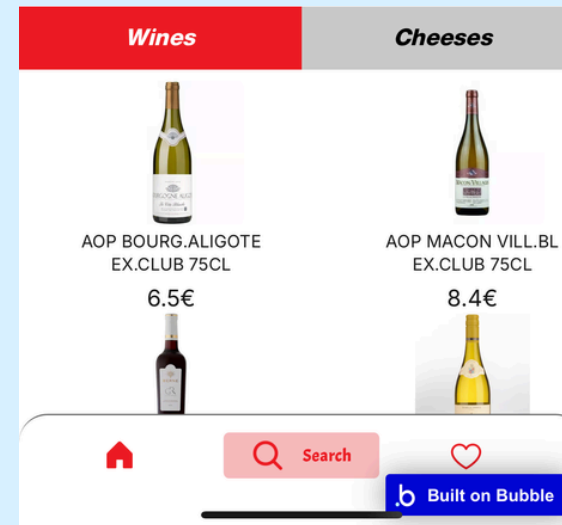

You'll then be able to select the meal you're interested in (e.g., Gratin Dauphinois).

Once a meal is selected, you'll be able to view all the available filters related to it. You can also add the meal to your favorites, making it easier to find next time.

At the bottom of the page, you'll find a curated selection of wines that pair perfectly with the chosen meal, ensuring the best tasting experience possible.

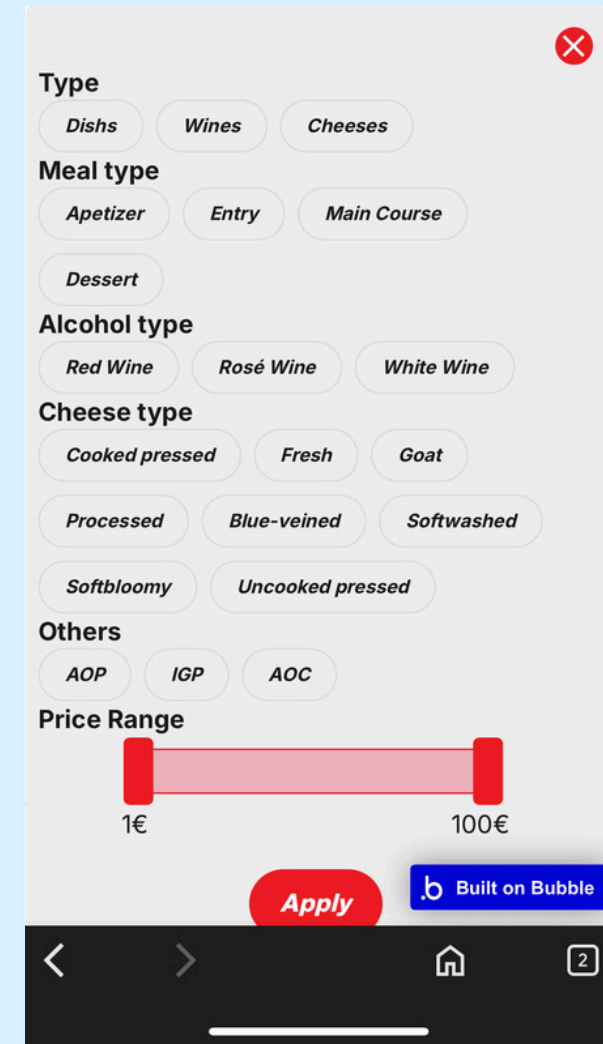

You'll also discover a variety of cheeses selected to enhance the flavors of your meal, creating a balanced and enjoyable tasting experience.

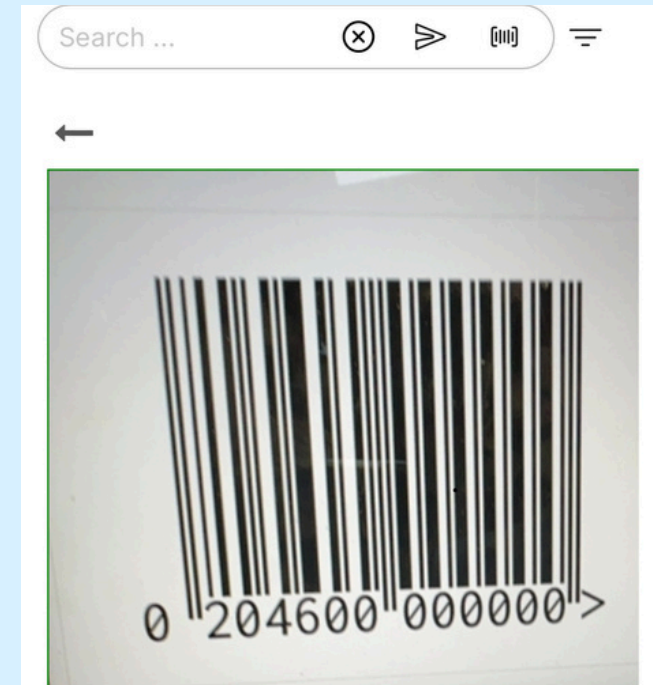

Tap here to view all available filters.

The filters help you quickly narrow down your search—whether you're looking for a specific dish, wine, or cheese—so you can find exactly what you want.

Tap this icon to open the barcode scanner.

With the barcode scanner, you can scan dishes, wines, or cheeses to instantly access their dedicated product page within the app.

Thank you for reading
